Troubleshooting guide

References to the remote control apply only to SL-CT352.

Before requesting service, make the following checks. If you are in doubt about some of the check points, or if the solutions indicated in the chart do not solve the problem, consult your dealer for instructions.

No play.	<ul style="list-style-type: none"> ● The HOLD function is on. Cancel HOLD (↔ page 4). ● The batteries may be depleted (↔ page 3). ● The disc isn't correctly set. ● The disc is scratched or dirty. (Tracks may be skipped.) ● There is moisture on the lens. Wait for about an hour and then try again. ● The lens is dirty: clean it with a blower (recommended product: SZZP1038C). If the lens gets marked with fingerprints, gently wipe them off with a cotton swab.
No sound or there is a lot of noise.	<ul style="list-style-type: none"> ● Ensure the plugs are inserted firmly. ● Wipe the plugs with a clean cloth. ● The disc is scratched or dirty. ● The elapsed play time disappears and sound is interrupted if bumps continue repeatedly.
Play doesn't resume from the track where play stopped at.	<ul style="list-style-type: none"> ● This doesn't work during random play. ● It may not work correctly under some conditions.
Play doesn't start from the first track.	<ul style="list-style-type: none"> ● Random play modes may be on (↔ page 4). ● Play resumes from the track where you last stopped play (↔ page 4, Play). (If the lid is opened while the unit is turned off, the resume function may not be cancelled.)
Cannot specify point A or B.	You may not be able to specify point A or B at the end of a disc.
Cannot change the anti-skip mode.	If [◀◀] or [▶▶] is pressed before [MEMO] you cannot change the mode.
SL-CT352 The unit malfunctions when connected to other equipment.	Be sure to connect other equipment through the remote control. If speakers are connected directly to the unit, they should have an impedance of 1 kΩ or less.
Cannot hear the remote control's operation tone.	The operation tone may be turned off (↔ page 4).
The remote control does not work properly.	<ul style="list-style-type: none"> ● Remove the plug and reinsert it as fully as possible. ● Use only the included remote control to operate the unit.

The AC adaptor becomes warm during recharging.	This is normal.

The batteries are taking a long time to recharge.	The batteries may take as long as 4.5 hours to recharge under some conditions.
Play time is short after recharging.	<ul style="list-style-type: none"> ● This may occur the first time you charge the batteries or if you haven't used them for a long time. Play time should be restored after a few recharges. ● The batteries can go flat if you leave the AC adaptor connected after charging is complete. ● If play is extremely short even after fully recharging the batteries, the batteries may have exceeded their life (Rechargeable batteries can be recharged approximately 300 times). Please purchase new nickel-metal hydride rechargeable batteries (Europe: HHR-4AGE/2B Other areas: HHR-4AGT/2B).
The battery indicator fails to appear or is incorrect.	<ul style="list-style-type: none"> ● The indicator does not appear when the AC adaptor is connected. ● The indicator may not appear correctly when using the rechargeable and dry cell batteries at the same time and under certain conditions.
